Autosomal	Y-STR																																																												
Samples concentrated where necessary: n/a _____	_____																																																												
Quantitation Blank acceptable: n/a _____	_____																																																												
Size standard within .5 bases: n/a _____	_____																																																												
Ladder peaks correct and above 75 RFU (autosomal) or 50 RFU (Y): n/a _____	_____																																																												
Positive Control DNA Type correct: n/a _____	_____																																																												
Negative Controls acceptable: n/a _____	_____																																																												
Kits in report: n/a _____	_____																																																												
Allele Table transcription correct: n/a _____	_____																																																												
Statistics transcription correct: n/a _____	_____																																																												
Contamination log completed: n/a _____	_____																																																												
Workbook calculations checked: n/a _____	_____																																																												
Chain of custody included: n/a _____	_____																																																												
Analyst Review Date: _____																																																													
Autosomal	Y-STR																																																												
Samples concentrated where necessary: n/a _____	_____																																																												
Quantitation Blank acceptable: n/a _____	_____																																																												
Size standard within .5 bases: n/a _____	_____																																																												
Ladder peaks correct and above 75 RFU (autosomal) or 50 RFU (Y): n/a _____	_____																																																												
Positive Control DNA Type verified: n/a _____	_____																																																												
Negative Controls acceptable: n/a _____	_____																																																												
Kits in report: n/a _____	_____																																																												
Allele Table transcription verified: n/a _____	_____																																																												
Statistics transcription verified: n/a _____	_____																																																												
Review of raw data: n/a _____	_____																																																												
Contamination log verified: n/a _____	_____																																																												
Workbook calculations checked: n/a _____	_____																																																												
Chain of custody included: n/a _____	_____																																																												
Agree with interpretation: Initials: _____ Date: _____
